[JAVA Algorithm Constraints Check Failed: MD5withRSA](#)

SSLHandshakeException: sun.security.validator.ValidatorException: PKIX path validation failed:
java.security.cert.CertPathValidatorException: Algorithm constraints check failed on disabled signature algorithm:
MD5withRSA.. ValidatorException: PKIX path validation failed: java.security.cert.CertPathValidatorException: Algorithm
constraints check failed: MD5withRSA.. When running https://github.com/coheigea/testcases/tree/master/apache/cxf/cxf-
benchmarks/cxf-jmh with Java 8 I see 2 failures because of CertificateException: Certificates does not conform to algorithm
constraints. ... error : [informatica][SQLServer JDBC Driver]SSL handshake failed: java.security.cert. ... We can use the same
certificate by enabling "MD5withRSA " (Not Recommended) ... iv) Do test connection and check if the persists or not..
Algorithm constraints check failed on signature algorithm: MD5withRSA ... Solution: in the JDK_HOME/jre/lib/java.security ,
we need to make some changed. ... disabledAlgorithms=SSLv3, MD5withRSA, DH keySize
